## Programme Overview

Bath Spa University Diploma in Art and Design (Level F) is a studio-based course offering the opportunity to explore Art and Design, through experimentation and discovery. As a transitional course you will be introduced to many ways of thinking, seeing and doing through engaged and active projects in preparation for your study at undergraduate level.

This lively paced course of workshops, lectures, talks and demonstrations is structured to empower you in broadening your field of enquiry, suspending judgement and taking ownership of what you do in a specific specialist area. Throughout the course you are encouraged to make, observe and investigate visually exploring new territory and challenging perceptions.

A series of lectures, personal research, seminars and a suite of local and regional visits are delivered to inform your critical contextual awareness. A key part of the course is the development of an informed dialogue around your project work enabling a greater reflection when developing and reviewing your work.

Throughout the course workshops, seminars and one to one tutorials introduce you to personal approaches to problem solving addressing practical, theoretical and technical issues within group and personal projects. Studying the programme, you will have the opportunity to learn skills to manage a project, have project outcomes and communicate these to an audience.

Throughout the course there will be opportunities to present your work verbally and visually, developing and honing communication and presentation skills in preparation for undergraduate study.

*Credit awarded for a Foundation Diploma or University Certificate will be Bath Spa University credit and will not necessarily be recognised outside of the University.*

## Programme Aims

1. To engage students in developing their own ambitious, inquisitive and reflective art and design practice as part of a learning community.
2. To provide strategies for students to develop their own theoretical, contextual and material research within the disciplines of Art and Design.
3. To stimulate an analytical, critical and ethical approach to learning through art and design practice.
4. To develop the students' skills to observe, communicate, and visualise, an understanding and evaluation of art and design.
5. To equip students with the knowledge, confidence and skills to work collaboratively or independently in preparation for undergraduate study in art and design.
